

FICHES DÉMOGRAPHIQUES DES PERSONNES IMMIGRANTES DANS LES VILLES ET MRC DU QUÉBEC

Données du recensement 2021

Institut de recherche sur l'immigration et
sur les pratiques interculturelles et inclusives

■ Collège de Maisonneuve

Mot du directeur de l'Institut de recherche sur l'immigration et sur les pratiques interculturelles et inclusives (IRIPII) du Collège de Maisonneuve

Nous sommes fiers de vous présenter un outil développé par l'Institut de recherche sur l'immigration et sur les pratiques interculturelles et inclusives : les *Fiches démographiques des personnes immigrantes dans les villes et MRC du Québec*, établies à partir des données du recensement de Statistique Canada de 2021. Cette initiative ambitieuse a pour but d'enrichir les municipalités d'informations démographiques détaillées sur leur population immigrante, offrant une base solide pour une planification éclairée et adaptée aux réalités municipales.

Cet outil précieux permet d'élaborer un portrait fidèle des communautés immigrantes à travers le Québec, analysant leur composition selon différents statuts d'immigration, tels que l'immigration économique, le parrainage familial, le statut de réfugié, la résidence temporaire, et la représentation des minorités visibles.

La centralisation de ces données par municipalité nous offre une perspective détaillée des tendances migratoires locales, permettant ainsi de :

- Adapter les services et infrastructures aux besoins spécifiques de la population immigrante.
- Concevoir des politiques publiques inclusives facilitant l'intégration des nouveaux arrivants.
- Veiller à ce que nos initiatives soient en phase avec la diversité croissante de nos communautés.

Les fiches démographiques sont conçues comme un outil dynamique, stimulant le partage de connaissances et la collaboration entre les différents acteurs. Elles encouragent l'innovation dans l'urbanisme et le développement régional et appuient les décisions stratégiques en matière d'aménagement du territoire, de développement économique, d'éducation, de santé et de services sociaux.

Couvrant toutes les villes et MRC du Québec, ce projet offre une vue globale et comparée essentielle à la compréhension des dynamiques migratoires dans notre province.

Je suis convaincu que ces Fiches démographiques seront une ressource inestimable pour les municipalités, contribuant significativement au développement de nos communautés. Je souhaite exprimer ma gratitude envers notre équipe engagée, sans qui ce projet n'aurait pas été possible, et je vous encourage vivement à vous y impliquer.

Ensemble, faisons de ce projet une réussite et engageons-nous en faveur d'un Québec toujours plus inclusif et prospère pour tous.

Habib El-Hage,
Directeur de l'IRIPII

Comment interpréter les données ?

Ces données se basent sur les définitions de Statistique Canada (2021). Selon ces définitions :

Immigrant

Individu ayant été reçu ou étant résident permanent. Cela inclut ceux qui ont obtenu la citoyenneté canadienne par naturalisation. Ainsi, la catégorie des immigrants comprend les résidents permanents, les résidents non permanents, et les citoyens naturalisés.

Première génération

Personnes nées à l'extérieur du Canada qui résident au Canada.

Statut de génération

Indique si l'individu ou ses parents sont nés au Canada ou non.

Immigrants économiques

Immigrants sélectionnés pour leur contribution potentielle à l'économie canadienne.

Réfugiés

Individus ayant obtenu le statut de résident permanent en raison d'une crainte fondée de persécution.

Minorité visible

Personne n'appartenant pas à la majorité blanche selon la Loi sur l'équité en matière d'emploi, incluant notamment les groupes Sud-Asiatique, Chinois, Noir, Philippin, et d'autres.

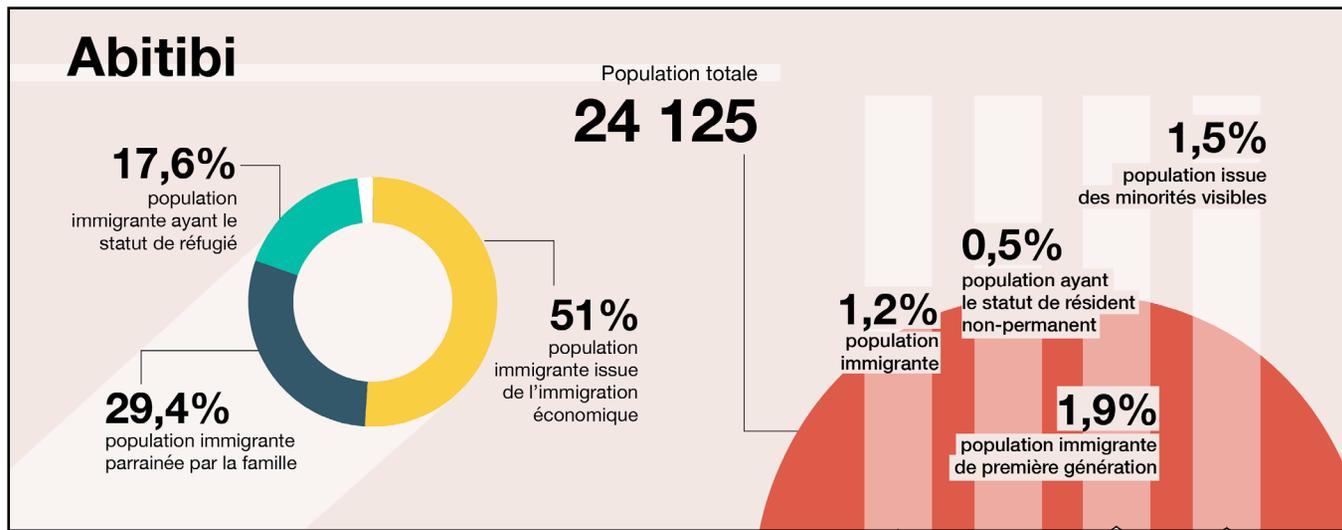

Immigrants parrainés

Immigrants parrainés par un citoyen canadien ou résident permanent.

Résidents non permanents

Personnes avec un lieu de résidence habituel au Canada, détenteurs d'un permis de travail ou d'études, ou ayant demandé le statut de réfugié.

Pour lire les données sur les fiches, il faut d'abord observer le chiffre total de la population, puis celui de la population immigrante, qui comprend la somme des immigrants économiques, des réfugiés, des parrainés par la famille, et des résidents non permanents.

Par exemple, en Abitibi, les immigrants représentent 1,2% de la population totale, dont 51% sont des immigrants économiques, 29,4% des parrainés, 17,6% des réfugiés, et une minorité de résidents non permanents. Parmi l'ensemble de la population de l'Abitibi, 0,5% sont identifiés comme minorités visibles, ce qui représentent 115 personnes.

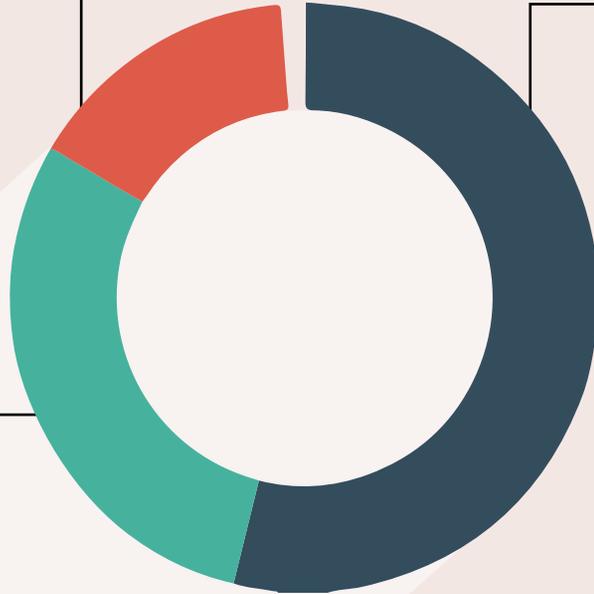

Pour avoir accès à une donnée d'une ville ou MRC, il suffit de faire **Ctrl+f** ou **command+f** sur son clavier et indiquer dans la fenêtre appropriée le nom de la ville ou de la MRC que l'on souhaite consulter.
